Castle Farm Estates

Castle Farm Estates are planning to develop their existing Ready Packaged Allergic Food Production site with the introduction of five new sustainable designed industrial/office units.

The buildings measuring 45m x 25m in plan are to be of steel frame construction with a green sedum roof and cedar clad walls. The structural framing is to be designed with aesthetics in mind and to introduce an element of architectural design. Beams are to be of cellular construction with intermediate columns in fair faced concrete and Y support arms. All connection details are to be well engineered solutions.

SMA have provided the following services:

- Transportation Assessment
- Section 278 Works
- Flood Risk Assessment and Drainage Strategy
- Structural Engineering

SMA provide the following services

- Transportation
- Infrastructure
- Civil Engineering
- Structures
