# Kings School Gloucester Sports Hall

The new Sports Hall for Kings School Gloucester provides netball, badminton, cricket and gym facilities with changing rooms and storage.

The hall has been designed with a curved roof supporting an aluminum standing seam roof providing clean structural form with aesthetically engineered connections.

The building is clad in masonry and kalwall glazing to 3.5m height and cedar cladding above onto stud wall construction.

The development is located close to the flood plain and has a raise suspended floor construction to allow for flood waters to flow through voids below the building.

SMA provided the following services:

- Transportation Assessment
- Flood Risk Assessment
- Surfaces Water Drainage Strategy
- Civil Engineering
- Structural Engineering
