Pinewood Gatehouse Building

The new gatehouse building forms the new entrance into Pinewood Studios. The gate house straddles the access road between a new S278 roundabout and internal gyratory junction. The building has been designed with a slim roof profile, using the natural deflection of the steel frame to channel rainwater runoff towards the building and direct it through hidden rainwater pipes to a rainwater harvesting facility.

SMA provided the following engineering services:

- Development planning
- Water and environment
- Civil
- Infrastructure
- Structural

SMA provide the following services

- Transportation
- Infrastructure
- Civil Engineering
